Methodological Note

The Consumer Price Index (CPI) and the accompanying report are prepared monthly by the Central Statistics Department (CSD) at the Ministry of Planning and National Development (MoPND). January to December 2012 is the price reference period, for which the CPI was set to 100.

The CPI is compiled from approximately 520 product prices collected in Hargeisa, mainly from the city's two biggest open-air markets. Those product prices are weighted according to the representative consumption basket, which is calculated based on consumption data from the Somaliland Household Budget Survey (2013) and auxiliary data sources to overcome data gaps.

Standards for price statistics. For instance, the CPI follows the Classification of Individual Consumption by Purpose (COICOP), elementary aggregate indices are calculated using the geometric average method (Jevons index), and higher-level indices are computed as weighted arithmetic averages of their sub-indices (Laspeyres index).

Time series for the CPI and its main components, annual and monthly inflation, as well as detailed information on methodology are available on the **CSD website: <https://somalilandcsd.org/>**

Consumer Price Index summary for July 2024

In July 2024, the overall CPI increased at 0.9% over the previous month, and increased 9.9% over the same month in the previous year.

Table One below: - summarizes the month-over-month and year-over-year changes in the overall CPI and for the main COICOP groups.

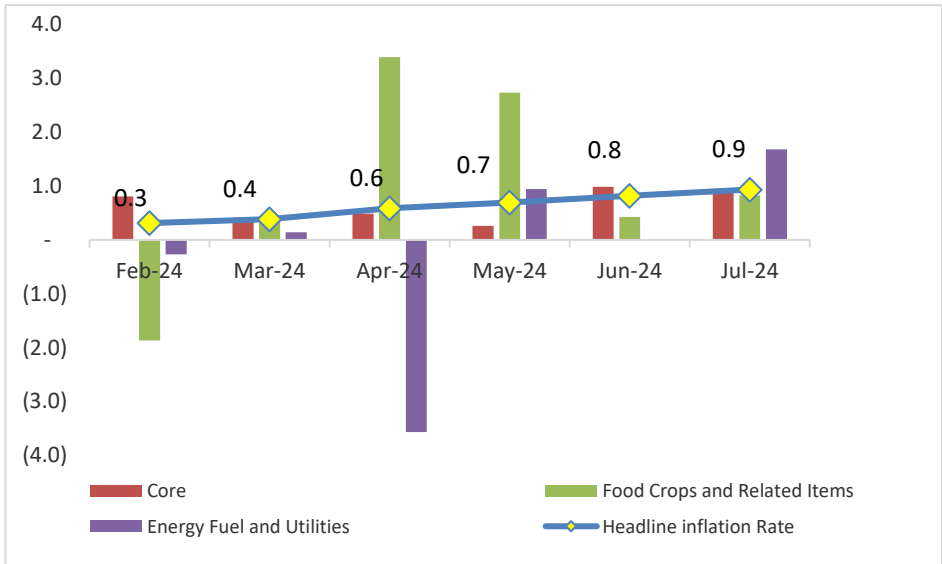

Table 1. Monthly and annual change in overall CPI and main COICOP Divisions for July 2024

Code	Main Divisions/classes	Weights	July_23	Jun_24	July_24	Month Percent change	Annual Percent change
	HEADLINE INDEX	100%	225.91	246.09	248.39	0.9	9.9
1	Food and non-alcoholic beverages	41.75%	260.04	292.21	296.02	1.3	13.8
1.1	FOOD	38.71	263.70	296.37	300.48	1.4	13.9
01.1.1	Bread and Cereals	10.48	220.92	225.11	237.26	5.4	7.4
01.1.2	Meat	6.05	290.01	336.30	336.30	0.0	16.0
01.1.3	Fish and sea food	0.37	231.06	260.98	260.98	0.0	12.9
01.1.4	Milk, cheese and eggs	4.23	267.41	269.08	269.08	0.0	0.6
01.1.5	Oil and fats	1.54	220.72	221.49	221.49	0.0	0.3
01.1.6	Fruits	3.26	412.95	480.07	487.64	1.6	18.1
01.1.7	Vegetables	6.28	261.67	360.01	361.11	0.3	38.0
01.1.8	Sugar,Jam,Honey,chocolate and confe.	2.53	237.61	252.57	252.57	0.0	6.3
01.1.9	Food products n.e.c	3.99	249.74	261.78	261.84	0.0	4.8
2	Alcoholic Beverages, Tobacco and Narcotics	4.56%	295.16	273.55	276.24	1.0	-6.4
3	Clothing and footwear	5.73%	209.64	245.83	247.13	0.5	17.9
4	Housing water, electricity, gas and other fuels	14.10%	218.83	224.61	226.35	0.8	3.4
5	Furnishings household equipment and routine household maintenance	5.55%	188.17	209.93	210.45	0.2	11.8
6	Health	2.56%	214.18	219.50	219.52	0.0	2.5
7	Transport	8.85%	143.12	149.13	150.01	0.6	4.8
8	Communication	2.99%	190.61	203.03	203.03	0.0	6.5
9	Recreation and culture	2.25%	177.88	192.43	194.97	1.3	9.6
10	Education	3.69%	160.53	161.09	161.18	0.1	0.4
11	Restaurants and hotels	3.35%	215.05	248.44	248.35	0.0	15.5
12	Miscellaneous goods and services	4.62%	207.80	232.17	234.38	0.9	12.8

- ## Recent trends in the CPI and its main components

Decomposing inflation into the three components presented in Figure one allows us to see the effects on prices of the movement by typically most volatile components of the CPI, Food crops increased and Energy, Fuel and Utilities prices increased. It also allows us to calculate “Core Inflation” by subtracting these volatile components, which more accurately reflects the economy-wide change in prices that influenced by aggregate demand and supply evolutions.

Figure 1. Monthly headline inflation and its main components, trailing Six months

- ## Monthly inflation rates over 6 months

Over the past 6 months, monthly headline inflation has slightly decelerated in the following months, before almost stopping February 2024 inflation rate decreased at 0.3% and march the inflation rate increased at 0.4% while in April the Inflation rate increased at 0.6%, where the following of May 2024 the inflation rate increased at 0.7% while June increased at 0.8% where in July Inflation rate increased at 0.9%

The biggest monthly increments were measured for the “Food Crop & Related items” component, in February 2024 decreased at minus 1.9%, and the inflation rate March increased at 0.4% and the inflation rate of April is increased at 3.4% while inflation of May 2024 decreased at 2.7% in inflation rate June decreased at 0.4% where in July inflation rate increased at 0.8%.

On the other hand, the “Energy, Fuel and Utilities” component monthly were in February 2024 the inflation rate decreased at minus 0.3% while the March inflation rate increased at 0.1%, and the inflation rate of April also decreased at 3.6% while in May 2024 the inflation rate increased at 0.9% and June the inflation rate is constant at 0.9% where in July inflation rate increased at 1.7%

The “Core Inflation” component, which reflects change in prices of goods in the consumption goods belonging to one of the other two components, was the least volatile of the three in February 2024 inflation rate were increased at 0.8%, the inflation rate of March decreased at 0.4% In April the inflation rate increased at 0.5% While in May 2024 inflation rate decreased at 0.3% and June increased at 1.0% and inflation rate of July 2024 decreased by 0.9%

Table 1. Monthly percentage change in overall CPI and main components

2023											2024		
Component	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul
Headline index	0.6	0.6	0.8	1.1	0.9	1.2	1.2	0.3	0.4	0.6	0.7	0.8	0.9
Core	0.4	0.6	0.7	0.6	0.3	0.6	0.5	0.8	0.4	0.5	0.3	1.0	0.9
Food crops & related items	1.4	0.6	1.8	4.2	4.6	5.5	3.5	-1.9	0.4	3.4	2.7	0.4	0.8
EFU	1.0	0.3	0.6	0.7	0.0	0.1	2.5	-0.3	0.1	(3.6)	0.9	0.0	1.7

2023											2024		
Component	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul
Headline index	8.6	7.6	7.3	7.7	8.4	9.4	10.2	10.0	9.7	9.6	9.4	9.6	9.9
Core	6.8	6.1	6.0	5.8	5.8	5.8	5.9	6.5	6.5	6.5	6.4	7.0	7.5
Food crops & related items	18.9	18.0	16.2	18.5	23.4	29.8	34.2	31.3	30.3	31.3	30.5	29.8	29.0

Table 2. Annual percentage change in overall CPI and main components

How to interpret inflation and CPI statistics?

Movements of the indices from one month to another usually are expressed as percentage changes rather than changes in index points. For instance, one index going from 50 in one month to 55 the next month represents a 10% increase in that index, which will be typically reported as a 10% rate of monthly inflation.

Table 4. Example on how to interpret the relations between index changes and inflation

Monthly Inflation		Annual Inflation	
Current month index level	248.39	Current month index level	248.39
Less index for previous month	246.09	Less index for same month of the previous year	225.91
Index point difference	2.3	Index point difference	22.48
Divided by the previous month index	246.09	Divided by the previous year index	225.91
Equals	0.00934617	Equals	0.09950865
Results multiplied by 100	0.00934617x100	Results multiplied by 100	0.09950865x100
Equals percent change	0.9%	Equals percent change	9.9%

NB: Since in JANUARY 2024 there were two price-related incidents; The value of local currency Somaliland Shillings were increased due to of exchange rate for the months and first week of July, that affected prices of some commodities to violated, especially Food Food and Non-Alcoholic Beverages such as Bread and Cereals & Meat being highly increased such Fruit, were effected to the exchange rate and political crisis in in the Gulf of Aden July 2024,

Alcoholic Beverages, Tobacco and Narcotics division, Transport, Recreation and Culture and Miscellaneous Goods and Services division inflation rate at increased by July 2024, also the price of energy particular Energy, Fuel and Utilities of the July 2024 was being increased.

Glossary

- Index reference period (Jan-Dec 2012=100): The period with which all other periods at are compared (the period for which the value of the CPI is set at 100).
- Percentage change: The change in an index or other statistical series from one period to another expressed as a percentage of its value in the first of the two periods.
- Annual inflation: Percentage change between the current index number for a particular month and the index number for the same month of the previous year.
- Monthly inflation: Percentage change between the current index number for a particular month and the index number for the previous month.
- COICOP: The Classification of individual consumption by purpose, abbreviated as COICOP, is a classification developed by the United Nations Statistics Division to classify and analyses individual consumption expenditures incurred by households, non-profit institutions serving households and general government according to their purpose.
